Effective single patient care, in-center or at home
Simple, touch screen controls for exceptional ease of use
Sleek, compact design
Internal leak detection system
Cool drain technology

Whisper Quiet
Nocturnal Mode

FEATURES
HEAT DISINFECT RO FOR SINGLE PATIENT CARE IN-CENTER OR AT HOME

The Centurion is an optimal choice for single patient dialysis water treatment in a healthcare facility or at home. The system can be routinely operated within a hard water environment (routine membrane maintenance dependent), allowing maximum flow rates of 1500 mL per minute as standard. With its sleek, compact design and whisper quiet nocturnal mode, the Centurion is unobtrusive in the home or clinical setting.

FEATURES

- Maximum flow rates of 1500 mL/minute
- The permeate specification exceeds recognized dialysis water treatment standards
- Integrated hot water disinfection of the membrane and loop for enhanced microbiological performance
- Cool drain technology
- Whisper quiet nocturnal mode
- State of the art, touch screen display for easy control
- Data logging
- Automatic service reminders
- Upgradable software via USB
- Remote stop/start
- CAT5 compliant break tank with air gap to protect raw water supply
- Semi-automated chemical cleaning program
- Recirculation and heat disinfection of product water up to the point of use
- Sanitary product sample port
- Internal leak detection system for peace of mind within the home environment
- Ultra-filtration final module provides enhanced microbiological specification
- Audible alarm with mute facility
- Antimicrobial coated fascia
- Anti-tilt
- Dedicated purpose built cart is available for portability

STANDARDS

- Health Canada Medical Device License 88968
